Arrangements have also been made to send out 25,000 great coats, which will be in addition to the great coats already possessed by each man; and the army clothiers, with a zeal for the welfare of the public service which does them great credit, have, at the request of the government, completed 30,000 additional suits of winter clothing, which will all leave the country before the middle of the month.

The changes of weather and season, with change of use and feed, have a very great effect upon the blood and sinuous fluids of horses. It is at these changes they require an assistant to nature to throw off any disorder of the fluids of the body that may have been imbibed, and which, if not attended to, will result in the Yellow Water, Heaves, Worms, Botts, &c. All of which will be prevented by giving one of these powders, and will at any time cure when any symptoms of disease appear, if used in time. They purify the blood, remove all inflammation and fever, loosen the skin, cleans the water, and invigorate the whole body, enabling them to do more work with the same feed. The action of there powders is direct upon all the secretive glands, and therefore they have the same effect upon the Horse. the Ox, the Ass, and all Herbivorous animals-all diseases arising from or producing a bad state of the blood, are speedily cured by them, CAUTION. -Remember and ask for Carlton's Condition Powers, and take no others.
